INTRODUCTION

YA Engineering Services, LLC (YAES) and engineer Zane Sadik, PE, PMP, CGC, DFE of YAES (Sadik) were retained by Zach Jett of Butler Weihmuller Katz Craig LLP., on behalf of his client, Evanston Insurance Company, to provide expert consulting advisory services relating to the origin and cause of the hit and run allision in Norfolk Virigina and related property damage. The bridge in question is a moveable railroad bridge and is located in Norfolk, Virigina, crossing the Elizabeth River. It is located north of the South Norfolk Jordan Bridge and the address listed on google is Elizabeth River Way, Chesapeake, VA 23324. The purpose of this review was to determine what caused or contributed to damage of the bridge in question, which is owned and operated by the Norfolk Portsmouth Belt Line Railroad and to provide a replacement cost value (RCV) estimate and an actual cost value estimate for a full bridge replacement. YAES was also asked to review the invoices of the project and advise Evanston Insurance Company during their involvement if payments from Evanston Insurance Company to Norfolk Portsmouth Belt Line railroad for items submitted up to \$10 million, which is the policy limits, were reasonable, related and necessary. YAES was requested to perform a review of materials, a site observation, research, and provide a written report discussing our findings related to the reported event and resulting damages.

This report is in part drawn from the site observation performed on July 29, 2024. Appendix A to this report is a link to the drone 2D map and 3D model along with 360 walk throughs.

Sadik also relied upon his extensive background in the engineering and construction fields. He obtained his Bachelor of Science in Civil Engineering at the University of Delaware, which included courses in construction, as well as structural engineering courses involving bracing, concrete and steel design. While working as a Structural Engineer at Morabito Consultants, he worked on several precast, concrete and steel designs. While working at Johnson, Mirmiran, and Thompson (JMT), he worked on several projects involving the design and construction oversight of projects which involved bringing a damaged structure back up to a level of service. Some of these damaged and rehabilitation projects involved crane rail rehabilitation on the port of Baltimore.

While working at JMT, Sadik attended night school at Johns Hopkins where he obtained a Masters in Civil Engineering with a focus on Structural Engineering. He then went to the CSX Railroad for a position as a Field Manager in the Load Engineering and Designs group. He helped design loading patterns and on-boarding of new customers, along with helping aid in derailment recovery events. These events often involved bridges and at times bridges which had failed or partially failed and were in need of repair or replacement. While at CSX, Sadik had the opportunity to oversee construction and operation of the Casky project, the first new railroad yard in decades, as a lead project manager over the \$100 million project. Casky involved several buildings, automation, fuel storage facilities, and numerous other engineering considerations. Sadik received the highest award at CSX at the time for his involvement in the project, the Chairman's Award of Excellence. Later at his time at CSX, Sadik was able to help run the moveable bridge initiative. This involved the rehabilitation and at times the replacement of railroad bridges in order to get them to a state of operation which could be reliably automated.

Sadik's CV is attached to this report as Appendix B; his trial and deposition list is attached as Appendix C; a representative sample of his continuing education coursework is attached as Appendix D.

PROPERTY AND INCIDENT BACKGROUND

The current Norfolk & Portsmouth Belt Line Railroad (NPBLRR) moveable bridge which crosses the south Branch of the Elizabeth River located in Norfolk, Virginia was built between 1955 and 1958 (from online records). The bridge which exists here today replaced an older swing-span moveable bridge which was built in 1898. (Figure 1). The original bridge was reported to have had a narrow clearance and was misaligned with a nearby highway bridge, which made navigation difficult for boats or vessels in the channels. The new lift bridge has a lift span of approximately 378 feet in length and provides a horizontal channel clearance of approximately 300 feet and a vertical clearance of approximately 135 ft depending on tide.

YAES was informed that the last train that crossed the Elizabeth River Bridge was on June 14, 2024. This was L252-14 which crossed the bridge headed to Rocky Mount, NC. The bridge operated this day without incident. This was the day prior to the incident which is shown in video footage to have occurred on June 15, 2024. The railroad did not work over the weekend so the train that informed the NPBLRR of the damage was the L25317 on Monday, June 17th, 2024.

The NPBLRR notified their insurance carrier Evanston Insurance Company and then hired a General Contractor (PCL) and specialty structural engineering firm, Hardesty & Hanover, LLC (H&H) to help access their bridge and either repair or replace the bridge. H&H ultimately decided the bridge could be repaired and an entire bridge replacement was not necessary.

Figure 1: Aerial view Elizabeth River Lift Bridge via Google imagery dated March 12, 2025

ON-SITE INVESTIGATION

YAES visited the subject property on July 29, 2024. A representative of NPBLRR allowed access to the property. Mr. Zach Jett, along with PCL and other subcontractors, were also in attendance.

A video of the vessel alliding the bridge was played prior to observing the bridge. YAES was informed this video was provided by the industrial property owner on the west side of the bridge which is directly south of a navy property. This video shows what appears to be a clear and sunny day. The vessel appears to be in the video and shows no sign of attempting to avoid the allision. It makes no attempt to slow down prior to the subject hit and run allision.

The bridge was walked and photographed. A 2D map and 3D model was created with the use of a drone. Pictures were taken by handheld camera and a 360 camera, along with photos from a drone were captured during the observation and can be made available upon request. A link to the 3D model is provided in Appendix A.

FINDINGS

- The center of the point of impact on the bridge structure to the fender system is approximately 75 feet. The distance from the center of impact to the edge of pier is approximately 50 ft. (Figure 2- Figure 4)
- The north bearing of the approach span was misaligned so far that it was hanging in the air. (Figure 5)
- The counterweight did not appear to be centered.
- The tower supporting the counter weight had been moved with bolts being sheared. (Figure 6)
- Several bracing members were no longer attached near the area of impact. (Figure 7)

DOCUMENT REVIEW

As part of this investigation, YAES reviewed or evaluated data and information from a number of third-party sources, including, but not limited, to:

- Various emails produced by NPBRR
- Invoices (EVANSTON 003886-004678)
- Procedure for repairing damage to approach span dated July 24, 2024
- Moveable bridges researched
 - Mobile River in Mobile, AL
 - Steel Bridge in Portland Oregon
 - 3-Mile Bridge I Mobile, AL
- Elizabeth River Bridge as-built drawings dated September 10, 1959
- Repair drawings by Hardesty & Hanover, LLC (H&H)
- Deposition of Paul Hudgins dated May 20, 2025
- PMI - A Guide to the Project Management Body of Knowledge PMBOK®, 7th edition

Mobile River (Similar lift bridge recently constructed)

YAES reviewed a similar lift bridge which was recently constructed for the purposes of cost estimating and as a benchmark for useful life. This Bridge is located in Mobile River, Alabama and

is a moveable railroad bridge. This bridge is a lift bridge today and is believed to have been completed on or around 2011. This bridge replaced an existing bridge named the "14-mile bridge" over the Mobile River. The 14-mile bridge was constructed in 1925 according to CSX and was a swing span bridge. This original 14-mile swing span provided a 146-foot channel clearance for vessels and was in working condition. The bridge was replaced in order to provide a larger clear span for vessels.

The new Mobile River bridge provided an improved channel span of approximately 300 ft of horizontal clearance for vessels and a 60 ft vertical clearance. The horizontal clearance was approximately double to the original 14-mile bridge it replaced. This is the same reason why the Elizabeth River bridge was replaced in the 1950s, which was to increase the width of the horizontal channel clearance.

According to a CSX article,

"The Coast Guard determined that the current bridge was an unreasonable obstruction to navigation, impeding increased marine traffic, and began working with CSXT to design a new, wider navigation span"

The existing bridge was approximately 83 years old when it was replaced for the benefit of marine traffic. The 14-mile bridge did not get a chance to fulfill its expected useful life due to vessel constraints and Coast guard direction.

In 2009 this bridge was estimated to cost approximately \$72 million. YAES was informed this bridge had a total cost of approximately \$110 million when it was finally complete and in service.

This project took approximately 2 years from start to finish and required significant coordination with the Coast Guard, railroad, design, and other involved parties.

RS Means price index

The RS Means index is stated to be a "Historical Cost Index" that can be used to convert national average building costs at a particular time to approximate building cost for some other time. This price index in July 2011 was 191.2 in July 2024, 2024, is 294.8

If we use this ratio, we get 2024 compared to 2011 as $(294.8/191.2) = 1.5418$. If we multiply the approximate cost of the Mobile River bridge by this amount 110×1.5418 , we get a project 2024 cost of \$169 million.

In summary, using the RS Means price index and using the approximate cost of the Mobile River bridge project of \$110 million, this same project would cost around \$169 million in 2024.

Moveable bridges

Below is a list of some moveable bridges by name, location and their current age or age at time of replacement

Mobile River - swing bridge to lift bridge- Mobile, AL

- was approximately **83 years old** at time of replacement
 - The bridge was not in need of replacement due to mechanical or structural issues and was operational leading up to the date of replacement.

- Bridge was replaced on order to have a large navigation channel for vessel traffic. This was directed by the Coast Guard.

Bayou Sara - swing bridge – Mobile, AL

- was over 100 years old at time of replacement (10 years of service at the original site, then relocated for the remaining 90 plus years) -replaced in 2017

3-mile bridge – swing bridge – Mobile, AL

- Is in service today. Believed to have been built in the 1920's
 - YAES was informed this bridge is approximately **100 years old**.

Steel bridge - Lift bridge – double deck – Portland Oregon

- Bridge is over **110 years old** today and still in service.

Bridge design life span

Bridges have a considerable design life span.

According to an article by the DOT *"the current goal with new construction is 100-years."*

According to an article published in the 2019 International Association for Bridge and Structural Engineering (IABSE) congress, *"the oldest (Railroad) bridges are close to 150 years old"*.

Talks with design professionals at class one railroads and contractors both stated that the current planned goal for moveable bridges is a 100 - 150-year life expectancy.

For all of the reason above, a life expectancy of 100 years is used in the ACV calculation later in this report.

DISCUSSION

From the documents reviewed, education, training, experience and conversations with current railroad employees, and railroad moveable bridge engineers, there are several moveable bridges over 100 years old, and their expected life expectancy is at or over 100 years. I was involved with the removal and replacement of the railroad moveable bridge replacement (Bayou Sara) which was replacing a bridge structure over 100 years old. To err on the conservative side, a 100-year life expectancy is used for this actual cost value analysis.

The bridge in question, located in Norfolk, Virginia which crosses the Elizabeth River was built in 1955-1958. This bridge replaced an existing bridge in order to increase the horizontal channel clearance for vessel traffic. This is a very similar reason for the replacement of the 14-mile CSX bridge which was located in Mobile River, AL. That CSX moveable bridge was also an existing swing span which was replaced by a lift bridge. That CSX bridge was not next to a Navy facility and not in a downtown environment. That bridge also had roughly a 300 ft horizontal clearance for vessels which is roughly the same as this Elizabeth River Lift Bridge in question, however, the horizontal clearance is much smaller (~65 ft versus 135 ft). Given these extreme height differences, it is obvious that the structure of the Elizabeth River bridge is much larger and would cost significantly more to build than the CSX Mobile River bridge.

To be overly conservative, using the Mobile River final cost of approximately \$110 million in 2011 and the RS means cost index of 191.2 in comparison to the 2024 index of 294.8 provides a 2024 projected cost of \$169 million. This is a rough order of magnitude estimate so the actual cost could range from minus 25% to plus 75% (~127M – 296M), as stated in the PMBOK 7th edition, section 2.4.2.2 Estimating. This estimate is at the low end given the following factors for this replacement in Mobile, AL versus this bridge in Norfolk, VA

- The cost index for location. The RS Means cost index by location in 3rd quarter of 2024 is:
 - Mobile, AL = -1.03 (less than avg.)
 - Norfolk, VA = 0.00 (Avg) or 1.03% higher than Mobile Alabama.
- Coordination with the US navy who has a facility next to the railroad tracks in Norfolk, VA
- Coordination with the Coast guard in a heavily traveled waterway in a city environment with Military security constraints
- The fact that this bridge is over 2 times taller than the one in Mobile, AL.
- Cost of having to either:
 - reroute traffic for an extended period of time – possible over 2 years
 - or to repair the bridge first, then work with the coast guard and military for an outage, then still replace the bridge.

Given that the life expectancy of these structures is between 100-125 years (using 100 years) and that this structure was 66 years when it was impacted (1958 to 2024) the structure would have roughly 34 years of expected useful life remaining or 34% at the low end. 34% of the conservative replacement cost above \$169 million is approximately \$57 million. YAES typically and consistent with industry standards performs an ACV on the replacement and not on repairs. This was also what the scope given to YAES on this specific project.

The repairs costs submitted and provided to YAES total to be approximately \$11 million for invoices through February 10, 2025. \$11 million is significantly less than \$57 million. The repair was also the fastest means of getting the bridge back into service and to minimize the added cost and time for the rerouting of trains.

This repair was done like and kind to the extent possible. This repair involved using steel to repair a steel bridge. It is standard practice to use bolts when repairing an old riveted steel structure as rivets are no longer a standard practice. Bolts have a much lower installation cost, making them more appealing as well. Temporary piers were installed to brace or hold the load of the damaged bridge while repair work was being completed. The courier weight had to be recentered and rebalanced. This repair was a necessary expense, and the open and obvious choice to minimize further delays to trains being rerouted.

This repair was not a betterment. A steel bridge was repaired with steel. The original bridge was never hit by a vessel. It would be unreasonable to say that a repaired bridge that was hit and repaired with similar materials is a betterment over the same bridge which was never hit or damaged by a vessel. It is reasonable to say that this bridge would now be less valuable since it was repaired after hit and run allision in the event of a sale.

Using a different approach and not basing the cost of the new bridge from a similar railroad bridge on the Gulf Coast, the non-movable section of the bridge could be estimated to be replaced at roughly 20K per linear foot during my time at CSX. This cost is now roughly 30k – 40k per linear foot accounting for inflation. This calculation will use the lower end of the range to error on the conservative side. The approach section up to the lift that was damaged is roughly 350 ft. The opposite side of the channel where the other tower lands would also need to be replaced. This approach section is roughly 180 ft. This is roughly 530 linear feet x 30k/ft = \$15.9 million. Based on my experience in the industry the cost of approximately 10k/sqft is used for the moveable section and tower supporting structure. The moveable section has 2 towers and a span. The towers are about $196 \times 19 = 3,724$ sqft x 2 = 7,448 sq ft. The moveable span is about $19 \times 378 = 7,182$ sqft. Total sqft = 14,630 sqft x 10k/sqft = 146.3 million. The rough order of magnitude estimate for the new bridge, which reuses some of the approach on the east end, comes to approximately \$162.2 million.

It is important to note that this estimate does not include:

- The additional costs and delays for any railroad traffic being rerouted during this 2 year plus project;
- How long will the coast guard allow for a channel outage. (this could be very limited and increase costs);
- How long and when would the US Navy allow for a channel outage. (this could be very limited and increase costs);
- The likely increase in cost for steel and materials with the current tariffs and other global economic concerns; or,
- Costs associated with the powerlines and utility coordination

CONCLUSIONS

Based on the review of materials provided, materials researched, site observations, conversations, and the education and experience of Sadik (who is both an engineer and a contractor), YAES is able to conclude the following to a reasonable degree of engineering certainty:

1. A tug that allided with the bridge structure causing the property damage observed.
2. The channel at the Elizabeth River bridge is approximately 300 ft wide and the vessel that allided with this bridge in question was over 200 feet from the center of the channel. (approximately 225').
3. Moveable railroad bridges have a proven record of remaining in service for over 100 years.
4. Railroad and other bridges planned life expectancies are 100 years +.
5. To error on the conservative side and using a 100-year life expectancy from the 100–125-year range, this bridge in question had at least 34% or 34 years of its useful life remaining.
6. The calculated RCV for this bridge, based on a similar lift bridge that is much smaller in height, and using the RS Means Cost index is \$169 million in 2024 dollars. Using 34% of remaining useful life gives an ACV of approximately \$57 million.
7. If using the other calculated RCV of \$162 million, the ACV would be approximately \$55 million.

- a. These estimates are at the early stages of the project and are expected to range from -25% to + 75%.
8. The repair was done in like in kind to the extent possible and was not an upgrade or betterment.
9. The repair costs paid by Evanston Insurance Company are fair, reasonable and necessary for this repair work directly resulting from the June 15th, 2024, hit and run allision.

CLOSING

YAES appreciates the opportunity to assist Butler Weihmuller Katz Craig LLP with this project. Our conclusions and recommendations are based on the conditions accessible and visible at the time of our inspection and on the information contained in the records and reports discussed herein. Should additional information become available, please forward to us so that we may review and consider it. We reserve the right to amend this report should new information become available. Please contact Mr. Sadik, PE, PMP, CGC, DFE if you have any questions or require additional services related to this project.

APPENDIX B – ZANE SADIK PE, PMP, CGC, DFE CURRICULUM VITAE

Zane Sadik

PE, CGC, DFE

Director of Engineering

Department

Tel: (302) 562-3209

Email: zane.sadik@yaeservices.com

Locations

Jacksonville, FL

Biography

Zane Sadik is a forensic engineer with over fifteen years of experience in various civil/structural, coastal, and construction investigations. His previous work in engineering and construction has included projects with a wide range of complexity, from small projects to leading construction over 100M. Projects have ranged from single-family home additions to tilt-up designs to wastewater treatment plants, port and harbor design and construction services, new railroad yards, and various projects in between. His drive for continuous improvement has made him a great leader in automation initiatives and has helped him to implement drone and 3d capabilities from numerous litigation cases. His experience with both design and construction, the ability to learn and implement new technologies, disaster response, and on-the-ground decision-making experience have helped clients of all kinds with this unique experience and the general ability for problem-solving.

Credentials

- PE | Professional Engineer
- CGC | Certified General Contractor
- DFE | Board Certified Diplomate in Forensic Engineering
- PMP | Certified Project Management Professional
- Certified Project Management Professionals
- FAA Certified Drone Pilot
- HAAG Certified Inspector - Residential and Commercial
- Occupational Safety & Health Administration Certificate
- OSHA 40-Hour HAZWOPER
- OSHA 30-Hour Construction
- OSHA 30-Hour General Industry
- Wind Certified Umpire
- Wind Certified Appraiser

Representative Consulting Assignments

- Civil/Structural | Investigation of hail, wind, storm, and construction related damages to residential, commercial, and industrial roofing systems.
- Construction Defects | Investigation of Commercial and residential construction defect cases ranging from single family homes to wastewater treatment plants.
- Civil/Structural | Determination of the cause and extent of water intrusion, moisture, and related damages as well as cost to repair.
- Premise Liability | Investigation of various premise liability cases ranging from commercial to residential properties.
- Civil/Structural | Determination of the cause, extent, and reparability of structural failures, construction deficiencies, and various impact damages to structures.
- Coastal / Structural / Automation / Fire | Determination of the cause, extent, and reparability of specialty medical prebuilt structures related to the medical marijuana industry.
- Civil/Structural | Investigation of residential and commercial window and

- door system failures following severe wind, tornado, and hurricane events.
- Catastrophe | Investigation of residential, commercial, and industrial structures for wind and flood-related damages following various hurricanes.
- Railroad | Various railroad accidents or derailments involving injury, loss of life, or damage to project and causation.
- Railroad | Expert witness services including depositions, trials, mediation, and settlement negotiations.

Professional Experience

- 2023 - Current | Senior Managing Engineer | YA Engineering Services
- 2021 - 2023 | Principal Forensic Engineer | Charles Taylor Engineering Technical Services-Building and Construction
- 2018 - 2021 | Forensic Engineer | CED Technologies Inc.
- 2015 - 2018 | Engineer | CSX Transportation, Inc.
- 2014 - 2015 | Black Belt | CSX Transportation, Inc.
- 2012 - 2014 | Leads Field Manager | CSX Transportation, Inc.
- 2008 - 2012 | Structural Engineer | JMT Inc.
- 2007 - 2008 | Structural Engineer | Morabito Consultants

Area of Practice

- ADA Compliance Assessment
- Bridge Engineering
- Building Code Upgrade Review
- Building Envelope
- Condition Assessment
- Construction Administration
- Damage Assessment
- Earthquake Engineering
- Failure Analysis
- HVAC and Mechanical Systems
- Historic Preservation
- Litigation Support
- Marine Structures
- Non-Destructive Testing
- Plumbing Systems
- Repair and Rehabilitation Design
- Repair Cost Estimating
- Roofing
- Structural Analysis
- Water Leakage Testing and Analysis

Education

APPENDIX D – ZANE SADIK PE, PMP, CGC, DFE - LIST OF REPRESENTATIVE CONTINUING EDUCATION

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **July 25 2024** for

Health Effects Caused by Mold (JCOM-00031)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **July 24 2024** for

Worksite Safety 01: OSHA Safety Introduction (RV-10449)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **July 23 2024** for

Residential Safety Essentials (RV-11312)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **July 16 2024** for

Florida - Wind Design and Wind Mitigation Requirements (RV-11448)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **June 21 2024** for

2021 International Building Code Essentials: Health Safety (JCOM-00065)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **June 21 2024** for

Accessibility and Visitability (RV-11378AW)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **June 17 2024** for

Green Building Materials: An Introduction (JCOM-00071)

Congratulations on your completion of this **2** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **June 17 2024** for

Principles of Design-Build (RV-10892AW)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **June 17 2024** for

Construction Cost Estimating: Resources and Processes (RV-11537)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **June 17 2024** for

2023 Florida Advanced Building Code: Accessibility, Application, and Administration, 8th Edition (JCOM-00050)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **June 17 2024** for

Florida Construction Contracting: Chapter 489, Section 101-114 (RV-11538)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **April 27 2024** for

Florida Workers' Compensation Law (V16) (JCOM-00070)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **February 18 2024** for

Concrete Fundamentals: An Introduction (RV-6238)

Congratulations on your completion of this **2** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **January 4 2024** for

Energy Conversion Ideal vs Real Operation Analysis (RV-10841)

Congratulations on your completion of this **4** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **January 3 2024** for

Solar Panels for Home Inspectors (RV-10600AW)

Congratulations on your completion of this **2** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **January 3 2024** for

Green Building with Steel - Part 4: Framing With Steel Studs (RV-10229)

Congratulations on your completion of this **3** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **January 3 2024** for

Green Building with Steel - Part 5: Erecting An Engineered Red Iron Steel House (RV-10230)

Congratulations on your completion of this **4** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **January 3 2024** for

2015 International Residential Code (IRC): Significant Changes (RV-10727)

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **January 4 2021** for

Florida Engineering Laws and Rules (RV-11447AW)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **August 18 2020** for

A Professional Engineer's Standard of Care (RV-11534)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **August 18 2020** for

Making the Flood Zone Determination (RV-6494)

Congratulations on your completion of this **3** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **April 10 2020** for

Fire Water Systems – Storage, Pumping & Distribution (RV-11199)

Congratulations on your completion of this **2** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **April 6 2020** for

The Ultimate Project Manager, Chapter 08: Managing Client Relationships (RV-10432)

Congratulations on your completion of this **2** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **April 3 2020** for

Advanced Project Management: Sustainability in Project Management (RV-11292)

Congratulations on your completion of this **2** hour online course.

Michael Schreiner

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **April 3 2020** for

Building Information Modeling (BIM) - An Introduction (RV-10205)

Congratulations on your completion of this **2** hour online course.

Michael Schreiner

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **April 2 2020** for

Accounting for Change Orders (RV-10015)

Congratulations on your completion of this **2** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **April 2 2020** for

Project Risk Management (RV-6588)

Congratulations on your completion of this **2** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **April 1 2012** for

Basic Civil Engineering - Sewage Treatment (RV-6788)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **March 27 2012** for

Basic Civil Engineering - Water Distribution 2 (RV-6122)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **March 15 2012** for

ADA Guidelines: General Site and Building Elements (RV-5246)

Congratulations on your completion of this **1** hour online course.

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **March 9 2012** for

ADA Guidelines for Small Towns (RV-5240)

Congratulations on your completion of this **2** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **March 5 2012** for

Achieving LEED Credits in New Construction Projects (RV-10228)

Congratulations on your completion of this **6** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **March 3 2012** for

Concrete Evaluation & Repair 2 (RV-3195)

Congratulations on your completion of this **8** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **March 3 2012** for

Concrete Evaluation & Repair 1 (RV-3108)

Congratulations on your completion of this **6** hour online course.

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **March 3 2012** for

Asbestos Management (RV-5351)

Congratulations on your completion of this **3** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **March 1 2012** for

ADA Guidelines: Accessible Routes (RV-4786)

Congratulations on your completion of this **2** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **February 28 2012** for

ADA Guidelines: Recreation Facilities (RV-5252)

Congratulations on your completion of this **2** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

Training Certificate of Achievement

Hereby Acknowledges that

Zane Sadik

has completed the in-service training on **February 27 2012** for

A Comparison of Seismic Design Methods (RV-952)

Congratulations on your completion of this **1** hour online course.

A handwritten signature in black ink that reads "Michael Schreiner".

Michael Schreiner, VP of Content

As an IACET Accredited Provider,
Vector Solutions offers CEUs for its
programs that qualify under
the ANSI/IACET Standard.

CERTIFICATE OF COMPLETION

Zane Sadik

has successfully completed the following course

OSHA 10 Hour Construction Program (RV-OSHAP3)

As an OSHA Outreach Training Program trainer, I affirm that I have conducted this OSHA Outreach Training Program training class in accordance with OSHA Outreach Training Program requirements. I will document this class to my OSHA Authorizing Training Organization. Upon successful review of my documentation, I will provide each student their course completion card within 90 calendar days of the end of the class.

Dan Johnson,

OSHA Authorized Construction Trainer

February 5 2012

Completion Date

Michael Ojdana, Chief Learning Officer, Content

PDUs applied from a previous cycle: 4.00

PDUs available to apply to the next cycle: 0.00

Approved PDUs: The number of PDUs PM has approved.**Applied PDUs:** The number of PDUs applied to the cycle. Applied PDUs may differ from Approved PDUs due to the maximum PDU requirements being met for the cycle, the need to leave room in the cycle for unfulfilled minimum requirements, or PDUs earned in the third year of a cycle in excess of the current cycle's requirements may be applied to the next cycle.

To calculate CEUs earned, every PDU earned by attending a PM SeminarsWorld®, eSeminarsWorld®, e-learning on demand course the activity is equivalent to .10 CEUs. For example, 10 PDUs equals 1 CEU.

Continuing Education Requirements

The following information pertains to your Certified General Contractor license (#CGC1527397):

Continuing Education courses are first used to satisfy deficiencies in previous renewal cycles.

For more information go to our [Frequently Asked Questions](#).

If your profession does not require you to report your CE credits, it will show a shortfall but will not hold or hinder your license renewal.

Select the desired renewal cycle and press "Search".

Press "Back" to return to the License menu.

View requirements for a different renewal period: **09/01/2020 to 08/31/2022** ▾
